

FLOW CYTOMETRY

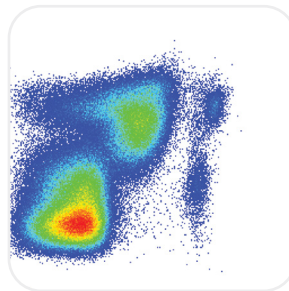

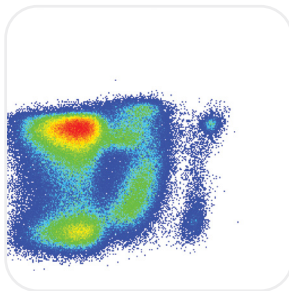

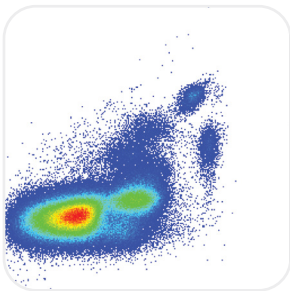

Our Expertise

- End-to-end scientific support of your projects from panel design to data interpretation
- Custom clinical flow cytometry-based assays for frozen matrices

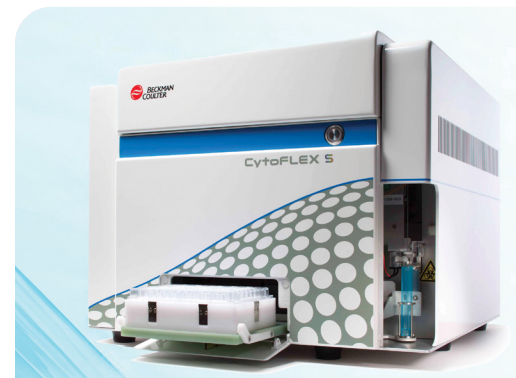

Why Partner With Us?

- Expertise developing and validating complex functional assays that reflect clinically relevant biology
- In-house phlebotomist to support rapid, robust method development
- Highest quality customer service and continuous communication

Assay Types

- T/B cell proliferation
- Gene delivery (GFP)
- PBMC selection
- Biomarker/cytokines
- Immune profiling
- Tissue expression
- Cell activation
- Rare cell analysis
- Myeloid cell biology

Technology

- CytoFLEX S Flow Cytometer
- 13 Detectors, 4 lasers
- 96 well plate loader
- FlowJo software package
