

**IMMUNOLOGIX**  
LABORATORIES

# OUR EXPERTISE

GLP, GCP, and CLIA-certified bioanalytical and biomarker services for large molecule drug development

## Bioanalytical Sciences

- PK assay development, validation, and sample analysis

## Immunogenicity

- Bridging and direct ADA assays
- Cell-based and competitive ligand binding neutralizing antibody assays

## Biomarker Sciences

- *De novo* and kit-based assays
- Off-the-shelf assays

## Cell & Gene Therapy

- PCR and flow cytometry capabilities

## Critical Reagent Services

- Reagent generation support, labeling, and characterization

## Translational Sciences

- Lab operations and consulting services with regulatory and drug development support, offering tailored bioanalytical and biomarker solutions

## Supporting All Stages of Drug Development

- Expertise in non-clinical and clinical assay development and validation
- Sample analysis for all phases of drug development

## Facilities and Support Teams

- 33,000-square-foot facility in Tampa, FL
- Validated environmental monitoring system
- Quality control
- Quality assurance
- Data systems
- IT systems
- Document control
- Technical writing
- Sample management team
